Audcomp Managed Services

You have Invested in your IT Infrastructure to Run your Business. It is Important to Ensure your IT is Running at Optimum Performance.

With Audcomp Managed Services, you have an experienced organization that can assume responsibility for your IT infrastructure from end to end. With unlimited remote support, Audcomp can manage everything from your desktops and network servers, to security and asset tracking.

Solution Overview

Onsite Manager

With this lightweight software application installed at your site, our managed services team can monitor and manage everything with an IP address including: desktops, virtual machines, servers, and the entire network.

Cloud based Service Center

Centralized dashboard collects data from the Onsite Manager and allows our managed services team to:

- View device health and performance data
- Perform rapid remote problem remediation
- Configure advanced updates
- Produce concise reports on how your network is operating
